

Impacts to River Course

Lower Mississippi River Mile 730, Memphis, Tennessee –

Breach of dam/levee/causeway at north end of McKellar Lake just east of Presidents Island
Revetment rerouting Mississippi River east of Presidents Island.

Lower Mississippi River Mile 770, just above Chute of Island No. 35

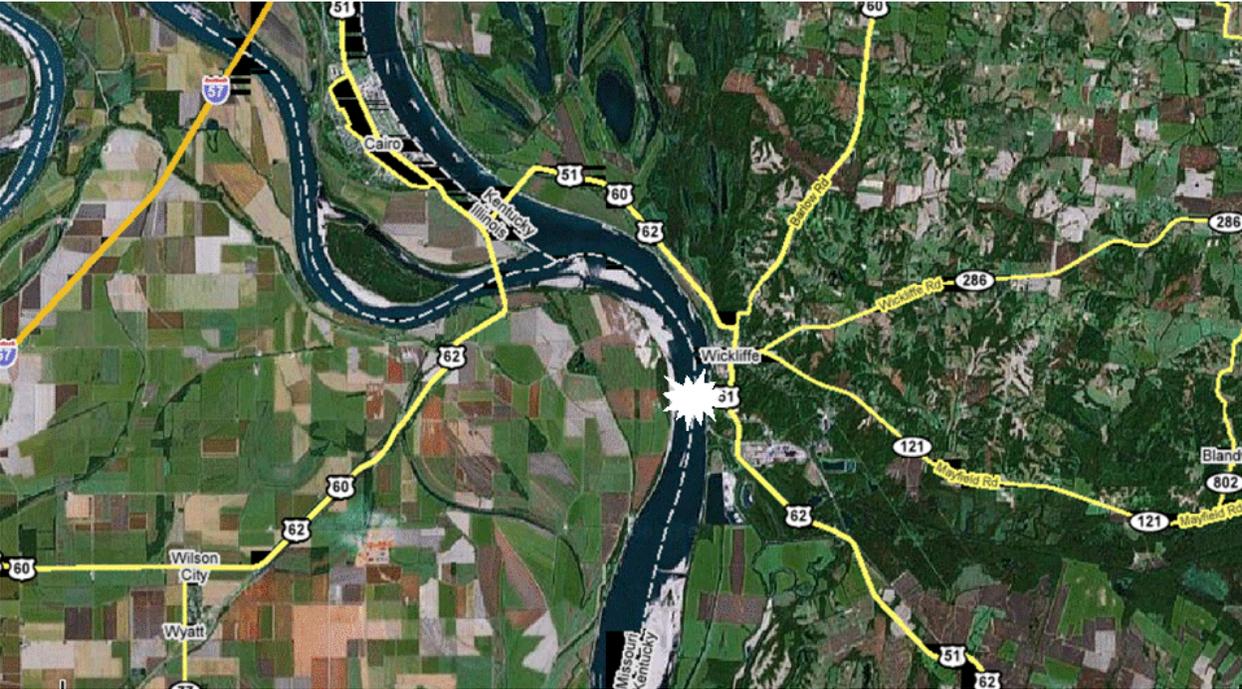

Slide on east/south bank at Richardsons, TN and rerouting of river west of present course across Morgan Point.

Lower Mississippi River Mile 900, Between Tiptonville and New Madrid –

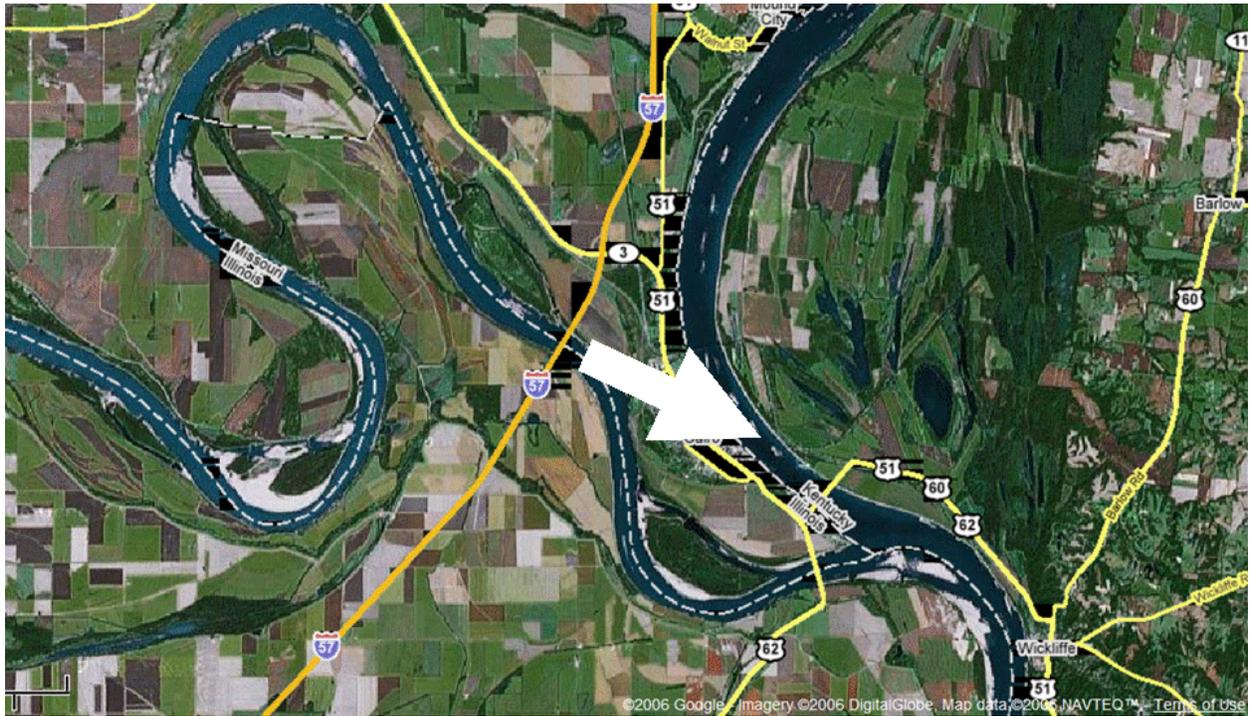

Mississippi River cuts off New Madrid ox bow.

Lower Mississippi River Mile 961, Below Wickliffe –

Land slide along Left Descending Bank just below Wickliffe temporarily blocks all possible navigation of the river and has a slight damming effect.

Upper Mississippi River Mile 7, Above Cairo –

River reroutes above Cairo, Illinois and makes Cairo an island between the Ohio and Mississippi River.
